COMMONWEALTH OF MASSACHUSETTS DEPARTMENT OF TELECOMMUNICATIONS AND ENERGY

RESPONSE OF BAY STATE GAS COMPANY TO THE FIRST SET OF INFORMATION REQUESTS FROM THE D.T.E. D. T. E. 05-27

Date: May 24, 2005

Responsible: Steven A. Barkauskas, Vice President Total Rewards Joseph A. Ferro, Manager, Regulatory Policy

DTE 1-9 Refer to Exh. BSG/SAB-1, at 46. Will the pension and PBOP expenses incurred during the test year be recovered in base rates or through the proposed reconciling adjustment? If recovery of these expenses is intended through the reconciling adjustment, provide the period of time over which these expenses are sought to be recovered.

Response: As indicated in the testimony of Joseph A. Ferro in Exhibit BSG/JAF-3, the recovery of the annual test year level of pension and PBOP expenses will be moved from base rates and recovered through a reconciling adjustment mechanism as a component of the Company's Local Distribution Adjustment Clause ('LDAC"). On a going forward basis, any amount of pension and PBOP expense greater than the 2004 test year level would be amortized over a three-year period, and thus, one-third of the amortized amount will be reflected in the subsequent three years' Pension and PBOP Expense Factor ("PEF"). The annual recovery period, as set out in Section 5.05 of the LDAC, proposed M.D.T.E. 37, Page 14 of 47, is November 1 through October 31.

As supported in the testimony of John E. Skirtich, Exhibit BSG/JES-1, the test year annual pension and PBOP expense is \$5,630,282.

As an example, if the Company were to experience for the twelve month period ending 12/31/2005 annual pension and PBOP expenses of \$6.5 million, then the Company would seek to recover \$5.9 million through the PEF beginning November 1, 2006:

5.6M + (56.5M - 5.6M) / 3 or 5.6M + 0.30M = 5.9M.

The additional \$300,000, plus carrying charges, would also be included in the PEF for the next two years, effective Nov. 1, 2007 and 2008.

Any difference between the actual recovery of pension and PBOP expenses and the intended recovery amount, which would be caused by the variance between actual and forecast firm sales and transportation volumes, would be recovered or returned through the Reconciliation Adjustment (RA_{PE}).
